# Webmail Access

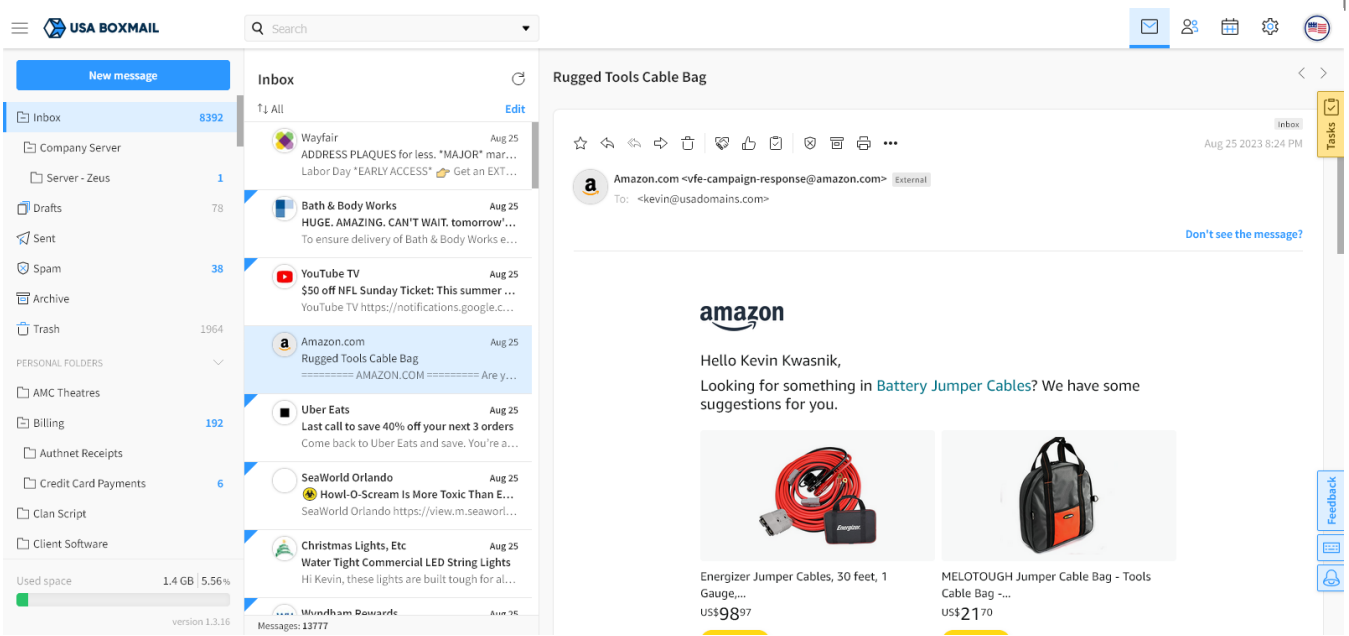

## Welcome to Webmail

Users can access their email in two ways. One way is by using a traditional email client such as MS Outlook or Thunderbird. The other way is by using our feature-rich Webmail Suite. Our Webmail allows you to send and receive emails, manage Tasks, share your calendars and contacts, as well as exchange instant messages. Webmail works easily from the web, is accessible anywhere, and you don't have to install any software.

Enter in the address bar of your browser (on your computer or phone): **https://webmail.usaboxmail.com** and log in with your credentials.

If you have activated two-factor authentication (2FA) you will be asked to enter an additional OTP code.

You can easily use our Webmail from computer, smartphones, and tablets.
