

Webmail Access

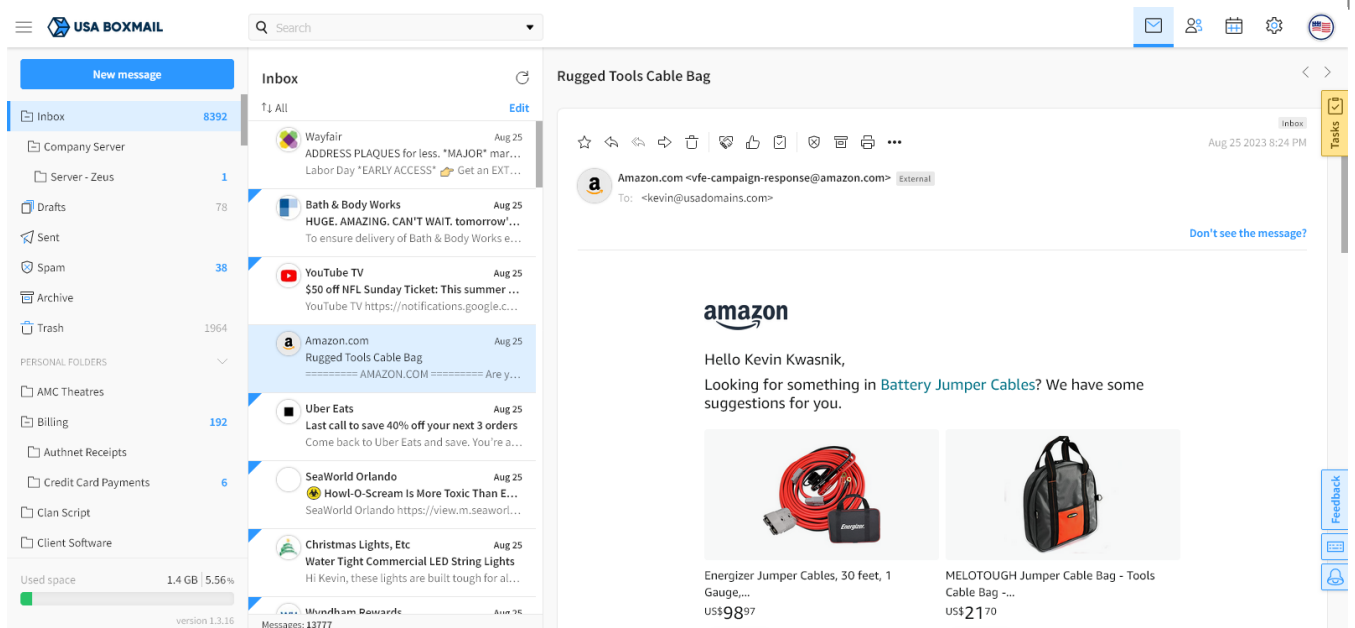

Welcome to Webmail

Users can access their email in two ways. One way is by using a traditional email client such as MS Outlook or Thunderbird. The other way is by using our feature-rich Webmail Suite. Our Webmail allows you to send and receive emails, manage Tasks, share your calendars and contacts, as well as exchange instant messages. Webmail works easily from the web, is accessible anywhere, and you don't have to install any software.

Enter in the address bar of your browser (on your computer or phone):
<https://webmail.usaboxmail.com> and log in with your credentials.

If you have activated two-factor authentication (2FA) you will be asked to enter an additional OTP code.

You can easily use our Webmail from computer, smartphones, and tablets.

The screenshot displays the USA BOXMAIL webmail interface. On the left, there is a navigation sidebar with options like 'New message', 'Inbox' (8392), 'Company Server', 'Server - Zeus' (1), 'Drafts' (78), 'Sent', 'Spam' (38), 'Archive', 'Trash' (1964), and 'PERSONAL FOLDERS' including 'AMC Theatres', 'Billing' (192), 'Authnet Receipts', 'Credit Card Payments' (6), 'Clan Script', and 'Client Software'. The main area shows an 'Inbox' with several emails, including one from Amazon.com titled 'Rugged Tools Cable Bag' (Aug 25). The right pane shows the open email content, which is a promotional message from Amazon.com to Kevin Kwasnik, offering suggestions for 'Battery Jumper Cables'. Two product cards are visible: 'Energizer Jumper Cables, 30 feet, 1 Gauge...' priced at US\$98.97, and 'MELOTOUGH Jumper Cable Bag - Tools Cable Bag' priced at US\$21.70. The interface includes a search bar, a 'Tasks' button, and a 'Feedback' button.
